Best offers a variety of business management solutions to small and medium-sized companies. As a Peachtree customer, you can appreciate the benefits of owning a Best Software accounting system. But like many businesses, you may be seeking a more complete business management solution, or you may see growth on the horizon. If so, Peachtree Special Edition of MAS 90 is the logical next step.

One of the many benefits of staying in the Best family is an easy transition path. Peachtree Special Edition of MAS 90 offers numerous tools that make your transition seamless, including the Conversion Guide and tutorial. Plus, our Conversion Specialists are experts with both Peachtree and MAS 90, and they offer you exceptional support to ensure your business continues to operate smoothly.

Once implemented, it won't take long before you realize why MAS 90 is recommended by more CPAs than any other business management software in its class. MAS 90 boasts a modular design that allows you to start with a core accounting system, then add modules to suit your business requirements. Your business can thrive on this accounting and business management software. That's because, from accounting and distribution to e-commerce and customer relationship management, Peachtree Special Edition of MAS 90 can expand to accommodate your business growth.

The advantages of staying in the Best family are truly numerous. Read further to discover why Peachtree Special Edition of MAS 90 represents the logical software choice for Peachtree customers who see growth on the horizon. For a Conversion Specialist near you, contact Best Software toll free at: 800-854-3415

Product Benefits

An Easy Transition

Moving from Peachtree to Peachtree Special Edition of MAS 90 is an easy transition. With valuable implementation tools and services, including a helpful conversion guide, a tutorial and our award-winning support team, your move to this new software system will be smooth and worry free. Plus, with Conversion Specialists stationed throughout the country, you'll always have an expert nearby who can ensure that your system performs up to expectations.

A Broad Spectrum of Capabilities

While Peachtree is focused mainly on small and emerging businesses, Peachtree Special Edition of MAS 90 boasts a more all-encompassing business solution. In fact, with its broad-ranging series of modules and industry-specific add-ons, the product possesses the functionality that small to mid-sized companies need to achieve a competitive edge. Choose to integrate as many modules as are beneficial to your business, then, as your company grows, you can expand your system with additional applications that suit your growing business requirements.

Decision-Making Power

Although Peachtree Special Edition of MAS 90 can't make your business decisions for you, it systematically provides insights that make the decision-making process much easier. Whether you need to drill down to find detailed information concerning an individual customer or gain a holistic view of your organization, Peachtree Special Edition of MAS 90 boasts a powerful reporting and analysis toolset that allows you to effectively make and support your critical business decisions.

Familiar User-Interface and Navigation

Peachtree Special Edition of MAS 90 offers a familiar look and feel for Peachtree customers. Since MAS 90 operates with a similar user interface and navigation tools, your staff will be able to get up and running with very little effort. Once implemented, your new system will help improve workplace productivity by streamlining your processes across all aspects of your business.

Advanced Integration

Like your current Peachtree software, the Peachtree Special Edition of MAS 90 system integrates with many industry-leading productivity software packages, including Microsoft Word and Excel. If you've become accustomed to working with these tools, you'll be able to continue doing so, plus you'll have more advanced integration capability.

Software Stability

Best has been expanding and adapting MAS 90 since 1988 to accommodate changing business needs and to take advantage of new technologies. With more than 75,000 customers nationwide, the system is proven software that sets the standard for stability.

Ease of Use

Peachtree Special Edition of MAS 90 is easy to learn, easy to implement and easy to use. All of this can translate into productivity gains and cost savings. Customers familiar with the Windows operating system will feel right at home with our software, due to its Windows look and feel. Users can navigate quickly and effortlessly through their daily tasks using the Business Desktop, an Explorer-like interface, which allows users to organize their tasks based on their personal preferences.

Core Accounting

Like Peachtree, Peachtree Special Edition of MAS 90 provides the accounting capability you need to successfully manage your finances. The five core accounting modules — General Ledger, Accounts Receivable, Accounts Payable, Bank Reconciliation and FAS Asset Accounting — provide the foundation upon which you can build a customized business management solution by seamlessly integrating with the other modules and solutions in the suite.

Distribution

Peachtree Special Edition of MAS 90 streamlines the complete cycle of purchasing, stocking and selling inventory. Our robust distribution toolset helps you improve customer service and loyalty, cut costs, and ultimately build profits. The system's distribution modules include: Inventory Management, Sales Order, Purchase Order, Bar Code and Credit Card Processing.

e-Commerce

Best is committed to providing you with ongoing software improvements as technology and business requirements evolve. That's why it comes as no great surprise that we're at the forefront of the rapidly expanding world of e-commerce. The e-Business Manager module for Peachtree Special Edition of MAS 90 provides an affordable, out-of-the-box solution that can quickly and effectively

bring your company into the online arena, while integrating seamlessly with your MAS 90 distribution system.

Project and Resource Management

Peachtree Special Edition of MAS 90 links and integrates with a series of modules that can lead your company to increased efficiency and profitability.

By adding Abra HR and Payroll to the core modules described above, you'll have a complete solution for tracking processes across all aspects of your business that affect your most vital asset — your employees. Or, if you are in a project-oriented business, the Job Cost module is an essential tool for keeping a close eye on job profitability.

Manufacturing

If your company builds the products it sells, making the move to Peachtree Special Edition of MAS 90 is a logical choice. The software provides detailed and accurate tracking and reporting throughout the manufacturing process — from building bills of materials to work-in-process tracking, to finished goods profitability.

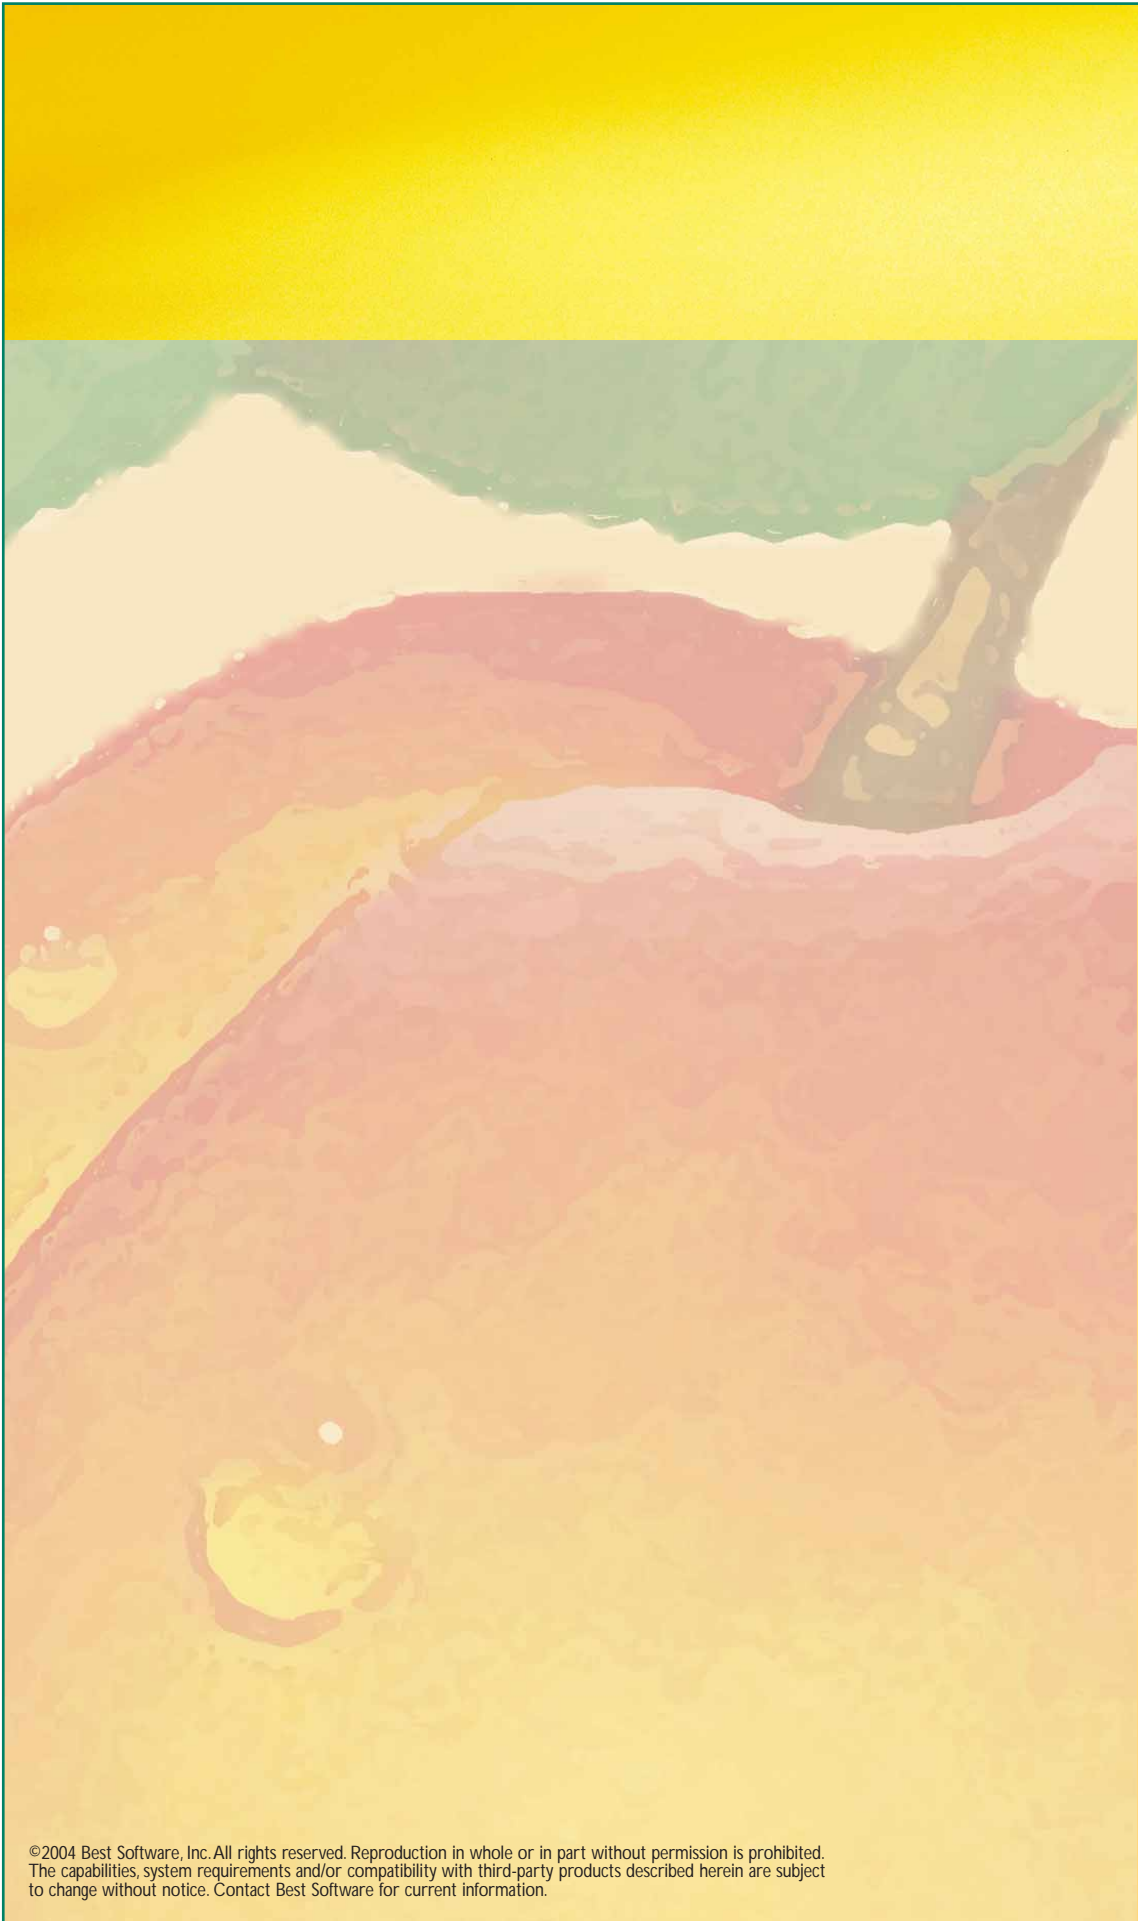

Business Intelligence and Integration Tools

Crystal Reports and Business Alerts are valuable business intelligence and integration tools. A graphical report writer, Crystal Reports offers presentation-quality

output for your accounting data. You can access template reports directly from a custom reports menu in each of our modules. Using Crystal Reports, you can send your customers professional-looking invoices, checks, quotations, sales orders and statements. Business Alerts can be added to the core of Peachtree Special Edition of MAS 90 as yet another innovative tool designed to keep you "in the know." Business Alerts acts as a virtual watchdog for your company's database. When a predefined condition is met (for example, if inventory drops below a specified level), Business Alerts will automatically send you an e-mail, so you can act accordingly.

Front Office Integration

By linking Peachtree Special Edition of MAS 90 to a customer relationship management (CRM) solution, your company can make significant strides in sales performance and customer service. Working independently, CRM applications (such as SalesLogix and ACT!) increase efficiency in customer-centric processes, including tracking and communicating with existing and prospective customers. When linked and synchronized to your Best Software system, a complete front office to back office solution is created. All of your customer information is current and is easily accessed by your sales force. With this capability your customers will feel they've never been so well cared for.
